

GEODRILL AUSTRALIA

CAPABILITY STATEMENT

Exploration drilling. Excellence at our core.

RC, Diamond and Coal exploration. Geotechnical, water bore and minesite dewatering. Four generations of drilling expertise serving Tier 1 mining clients across Australia — with hands-free rod handling standard on every surface rig.

— WHY GEODRILL AUSTRALIA

Excellence and safety at our core.

Established in 2006, GeoDrill Australia is a leading drilling company with a proven reputation in the mining and construction sectors. We are built around providing agile and effective solutions that exceed expectations and deliver success.

Headquartered on the Sunshine Coast with operations bases in Mount Isa and Moranbah, our company holds a diverse range of capabilities across exploration, geotechnical, water-well drilling and the environmental industry. GeoDrill Australia carries four generations of drilling expertise, servicing Tier 1 customers across Australia.

Our Team Members are our most valuable asset. Everyone at GeoDrill Australia prioritises excellence and safety in all aspects of the work — and we invest heavily in the training, education and personal development of our people.

CLIENT PROGRAMS

More than drillers. **Industry leaders.**

We hold ourselves and our equipment to the highest standards, continuously investing in our Team and cutting-edge technology to deliver exceptional service across the full exploration spectrum.

01 Remote Exploration

Remote camp management, Emergency Response Plans and robust safety management systems. Chartered flight logistics to remote locations, with FIFO maintenance crews on continuous rosters for uninterrupted field support.

02 Deep Directional

Directional software management with specialists in Navi and Wedging applications. Proficient in multiple daughter holes from a single parent, with full project management. Surface directional capability to 3,000m+.

03 Reverse Circulation

Specialists in reverse circulation drilling in combination with booster and air-pack configurations for maximum efficiency to 600m. Hands-free rod handling standard fleet-wide; track and truck-mounted rigs for site flexibility.

04 Diamond Coring

Core recovery where sample quality is non-negotiable. 8C, 4C, PQ, HQ and NQ core sizes. HQ & NQ Packer testing. Surface and underground configurations, with combination RC-DD programs managed in-house.

05 Aircore

Masters of aircore drilling methodologies, prioritising uncontaminated sample recovery and quality every metre.

06 Geotechnical

Experts in civil and minesite geotechnical drilling — SPT Hammer, Push Tube, Piezometer installation, Auger, Triple Tube Coring, Rotary Mud (Wash Boring) and Hammer (Rotary Air). Over-water drilling on floating & jack-up barges.

07 Water Bores & Minesite Dewatering

Installation of Class 1, 2 and 3 water wells nationally. Large-diameter drilling capabilities, commercial pump, tank, filtration and irrigation installation, and water analysis.

A well-maintained land & over-water fleet.

Track-mounted and truck-mounted rigs, maintained on a FIFO rotation by an in-house crew for maximum mechanical availability — supported by our custom-built online maintenance and project management system.

RIG	MAKE	CONFIGURATION
GDR02	Hydrapower Scout	MAN TGM 18.340 4×4 truck
GDR03	Hydrapower Scout	Isuzu FVZ 1400 truck
GDR06	Comacchio Geo 405	Track-mounted
GDR07	McCullochs DR950	DAF 8×4 truck
GDR09	Hydrapower HP850	Mercedes Actros 8×8 truck
GDR10	Hydrapower HP850	Mercedes Actros 8×8 truck
GDR11	Hydrapower HP850	MAN 8×8 41.480 truck
GDR16	Sandvik DE840	Mercedes Actros 8×8 truck
GDR17	Boart Longyear KWL 1600H	Tatra 8×8 truck (underground)
GDR18	Schramm T685WS	MAN 8×8 truck
GDR20	UDR1500	Track-mounted
